

# Picture Yourself In

*“Polysteel is the very best building material you can use for the exterior walls of your new home.”*

## **POLYSTEEL IS THE PERFECT WALL FOR HAWAII**

- 1. Walls are ten times stronger than walls made of wood, can withstand 200+ miles per hour hurricane winds**
- 2. Walls are three times cooler - up to R-50 energy rating**
- 3. Walls are three times faster to install, saving labor costs**
- 4. Termites don't like concrete or styrofoam - your home will last for centuries rather than only 20-30 years**
- 5. Walls reduce dust and pollen infiltration by 75%**
- 6. Walls have 2 hour fire protection**
- 7. Walls are cost effective, require less energy to cool, save on insurance costs, and appraise higher than wood or metal houses**
